Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The proposed amendments "... a wide-area network that allows access to the central system" (claims 1, 12, 13, and 14) and "a first transceiver associated with the first sensor ... communicates with a second transceiver associated with the second sensor" would overcome the prior art of record. Amending the claims to incorporate the proposed language of claim 10, "... the wide-area network is the Internet" would place them in condition for allowance and not raise new issue.
